

3rd Grade Math Information

Mrs. Konvicka - mkonvicka@weimarisd.org

Planning Period: 9:40 - 10:15

- **Agenda Spiral/Folder**

Please check this DAILY. This is where all assignments, due dates, quizzes, tests, and other important information is written. Please empty the “left at home” pocket. Anything placed in the “right back to school” pocket needs to be completed and returned.

- **Homework**

Homework is the page labeled “HW #.#” at the top. The first “#” is the 6 weeks we are in, the second “#” is the week we are in within the 6 weeks. There will be new homework every week, and is always due on the last day of that week. There will be NO HOMEWORK assigned the last week of every 6 weeks! Not returning homework on time, or incomplete homework, will result in a detention.

If homework is lost/misplaced, it is the student’s responsibility to acquire another homework that will be located in a labeled bin in the classroom.

- **Assessments/Tests**

The day before an assessment/test, students will be given their weekly packet to complete and go over for extra practice. This is to prepare them for the assessment at the end of each week, and the test at the end of each 6 weeks. Students will be allowed to use these weekly packets during the weekly tests. NOT during the 6 weeks tests.

- **Test Corrections**

- **Weekly Assessments** - If your student has **failed (<69%)**, they are **required to fix** the incorrect problems in time given in school, since our tests will be online. Students must show correct work to receive points back on their test for missed problems. Students *might* be allowed to take corrections home if they are unable to finish them during school hours. The corrections must be done in the student’s handwriting and returned by the due date. If the assessment is not returned by the due date, no points will be awarded, and the grade will be final.
- **6 Weeks Test** - All students will get the opportunity to make corrections on any 6 Weeks Test in class only. Students must show work to receive back points on their test for missed problems. If your student has **passed**, they can choose to make test corrections for extra points, but it is not required.

- **Basic Facts**

A different colored paper with cards to be cut out for extra multiplication practice will be sent home as your child passes their color facts. It is our goal to have our rainbow facts (0-12) complete by the end of the 4th 6 Weeks. *You may also practice using Reflex at home.* Students are encouraged to pass off their facts as soon as possible to ensure fluency comprehension within class.

Students will earn their Basic Facts grade by orally passing off their facts to me.

Ways to pass off facts:

- **Reciting the facts - “six times six equals thirty-six**
- **Skip counting - 4, 8, 12, 16, 20, 24, 28, 32, 36, 40, 44, 48**
- **Singing a song or jingle learned (usually a skip counting song)**

Students will be allowed to use any of the following opportunities to pass off their facts:

- Before School (7:30 - 7:55)
- Recess time
- Free time during class
- After school only if the teacher has no duties (dismissal - 4:00)

Basic Facts Grading

6 Weeks Grading Period	Multiplication Basic Facts
1	X0 - X3
2	X4 - X6
3	X7 - X9
4	X10 - X12
